

National Connectivity & Software Specialist (Support and Development).

Ricoh NZ Limited is dedicated to the sale and service of Ricoh manufactured products delivering an outstanding range of devices, solutions, services and finance offerings. As part of this outstanding range of services we are also committed and focused on the development and introduction of new technology.

To meet the future software and connectivity demands, we have identified the need to employ a National Connectivity & Software Specialist. The successful applicant will be responsible for the development, training and technical support for the front line Customer Service Engineers to attain the appropriate level of IT/Connectivity skills and knowledge.

You will be rewarded by working in a secure, technology focussed, multinational organisation that has a strong training and development culture. In addition to a fantastic work environment we also offer a competitive salary and benefits.

To be considered for this role the following is some of the criteria that you will have to meet:

- **Industry Experience** – 5 to 10 years service industry experience with proven success in training and development of a technical skills based, workforce.
- **Connectivity and Software Experience and Knowledge** – Operational and functional experience of various network environments, operating systems and software applications.
- **Communication** – Confident, clear and precise communicator both written and spoken, and has the ability to influence and work with/through others to achieve goals and objectives.

To apply please send a cover letter and your CV to jobs@ricoh.co.nz.

Applicants must hold a current work visa and a clean New Zealand Drivers licence.
