

Ricoh's Scanner Vision Document Capture and Distribution Solution

The Ricoh solution that's bridging the gap between paper documents, multifunction devices and document management systems.

Businesses today are demanding more efficient and document workflow processes. But in the move from paper based document workflows to electronic workflows, traditional document scanning processes have remained a frustrating, time-consuming headache – until now.

Place the document on the scanner and select the desired business process.

Keyword indexing at the touch of a button.

The scanned document is available to all users in your DMS, ERP or CRM system.

OCR Text recognition

Capture and extract information from paper and convert it into text format for further processing. The extracted data is automatically enhanced by the in-built deskew and despeckle functions improving accuracy and efficiency.

Scanner Vision has been developed by Ricoh to provide a simple, reliable, scalable and flexible scanning solution that enables users to scan, distribute, store and use documents like never before. Almost any Ricoh multifunction device (MFD) can be imbedded with the technology and it couldn't be easier to use.

Processing and Distribution

Scanner Vision's powerful image optimisation tools guarantee the best possible scanned document quality. Scanner Vision can also automatically recognise document features, such as barcodes, and route documents to their relevant location. Automatic and electronic document distribution can avoid data input errors, relieve staff of many laborious document processing activities, and speed up an Organisations workflow.

Scanner Vision's advanced and intelligent image processing (OCR, barcode recognition, auto page rotation); file conversion functionality (PDF; PDF/A, JPEG, TIFF, MS Word, MS Excel), and flexible image distribution capabilities ensure the scanned document is converted into the desired format and routed to the appropriate network location, or document repository.

Ricoh's Scanner Vision offers a range of connectors that enable seamless integration between Ricoh's MFDs and existing Document Management Systems, Microsoft SharePoint Server™, and other CRM and ERP Systems.

Scan 2 DMS

By utilising Scan2DMS you can upgrade your Ricoh multifunctional device into a high-performance system interface that integrates with your existing ERP, CRM or other business applications.

By utilising Scan2DMS you maximise the performance of your existing business systems and available hardware, and minimize further investment by making use of existing equipment.

Greg Quirk, Ricoh New Zealand Business Solutions Manager says: "The thinking behind Scanner Vision was to deliver a simple and functionally rich scanning solution that was an affordable option for businesses of all sizes. We created a solution that can be utilised by large corporates as well as small and medium businesses," said Mr Quirk.

And because of its flexibility, ease of operation and time-saving abilities there are few companies that wouldn't benefit from such a solution. It enables businesses get on with what they do best – doing business.
